

Risk ID	Category / Element	Risk Short Title	Description	Desired Outcome	Current Situation	Proposed Strategy
C00225 □	M2 Project Organisation	Creating clear visual models of Arini classrooms	The Arini Method encourages a value-driven, curiosity-centered learning environment. However, for many implementers and observers, particularly in unfamiliar or conservative contexts, the absence of a clear visual template can create uncertainty. There is concern about producing visual representations (photos, sketches, video walkthroughs) of what an Arini-aligned classroom might look like: layout, materials, interaction styles, sensory elements, child zones, and more. These models do not prescribe but illustrate the possibilities, enabling others to adapt them to their own space, resources, and culture.	Help communities visualize the space setup and learning flow of Arini-based classrooms What Could Go Wrong? Ambiguity could delay setup or lead to inconsistent environments	Interest expressed in seeing model classrooms, but materials not yet distributed	Provide template layouts and a photo pack from existing pilot-ready sites
