

Risk ID	Category / Element	Risk Short Title	Description	Desired Outcome	Current Situation	Proposed Strategy
C00241 □	M2 Project Organisation	Developing community hubs with integrated services	A Community Hub under the Arini Method isn't just a building, it's a living system where multiple services (education, health, social support, parental engagement) are brought together in one trusted local space. Integration means that these services aren't just co-located, but interlinked, with shared data, shared goals, and coordinated responses to individual and community needs. The hub becomes a node of holistic care, belonging, and growth. There is concern that the community hub may not develop fully.	Establish vibrant hubs offering education, health, and support services What Could Go Wrong? Fragmented implementation could lead to underused or misaligned spaces	Hub development scheduled for Months 10–12, location setup just beginning	Share model blueprints and coordinate joint planning with local authorities
