

Risk ID	Category / Element	Risk Short Title	Description	Desired Outcome	Current Situation	Proposed Strategy
C00242	M2 Project Organisation	Integrating services across education and health	There is concern about how education and health services can work in synergy rather than in silos. Within The Arini Method, learning is not viewed in isolation, it is deeply influenced by physical health, nutrition, mental wellbeing, and family dynamics. Integration means creating intentional, functional links between schools and health services: shared data, joint interventions, collaborative problem-solving, and mutually reinforcing goals.	Enable holistic child development through seamless service coordination What Could Go Wrong? Disjointed services may duplicate efforts or leave gaps	Protocols for integration referenced but unclear in execution steps	Create standard service maps and cross-sector MoUs for pilot sites
