

Risk ID	Category / Element	Risk Short Title	Description	Desired Outcome	Current Situation	Proposed Strategy
C00252 □	M2 Project Organisation	Equity in resource distribution among pilot sites	The Arini Method pilot spans a wide variety of EcoSociety locations, from urban hubs to remote communities, from well-connected regions to areas with limited infrastructure. Each site may differ in its access to teaching materials, digital tools, trained facilitators, and local support systems. There is a concern about ensuring that no pilot site is left behind due to resource disparities. It means addressing both tangible assets (like classroom kits, training access, internet connectivity) and intangible ones (mentorship, visibility, leadership support).	Ensure all pilots have access to core resources and support What Could Go Wrong? Disparities could undermine confidence and outcomes	No comparative resource checklist shared with EcoSocieties	Develop a standard allocation pack and allow justified local additions
