

Fan Milk (Danone) Ambient Yoghurt Line – Ibadan Plant

		
Sector: Food & Beverage Manufacturing	Location: Ibadan, Oyo State	Status: New production line commissioned September 2024; operational and supplying domestic dairy market

1. Project Snapshot

Fan Milk Plc, part of Danone Group, commissioned a US\$9.1 million ambient drinking yoghurt line at its Ibadan plant to meet growing consumer demand across Nigeria. The facility uses advanced processing technology enabling dairy products to be stored without refrigeration, reducing logistics and distribution costs.

2. Current Risks / Concerns

- 1

Ramp-Up Stabilization
Achieving production targets, quality control, and throughput rates
- 2

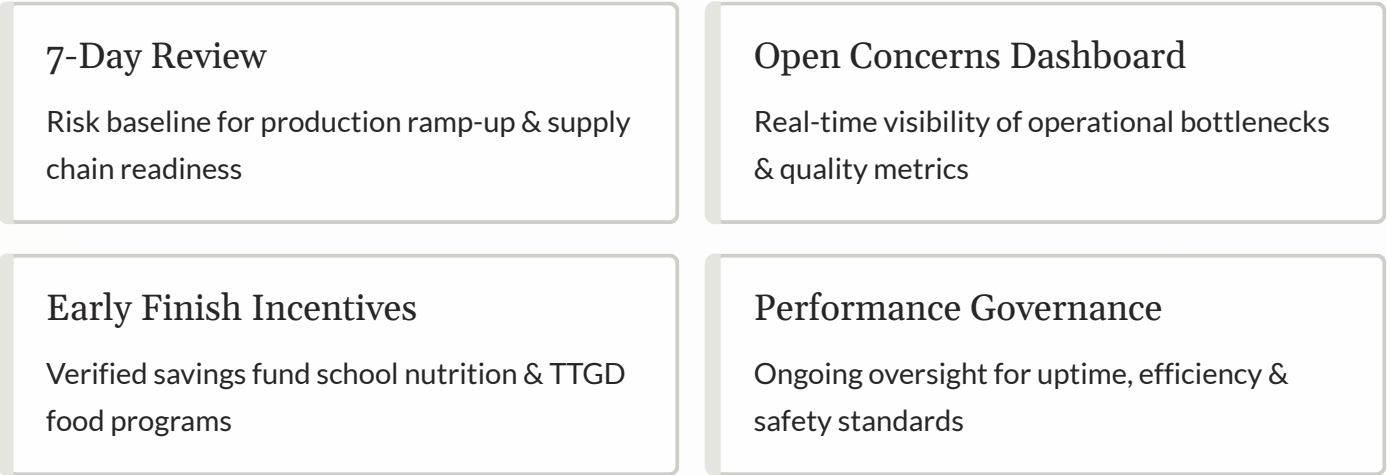

Supply Chain Interfaces
Milk suppliers, packaging, cold-chain and non-cold-chain logistics
- 3

Energy & Utilities Reliability
Power outages impacting sensitive processing equipment
- 4

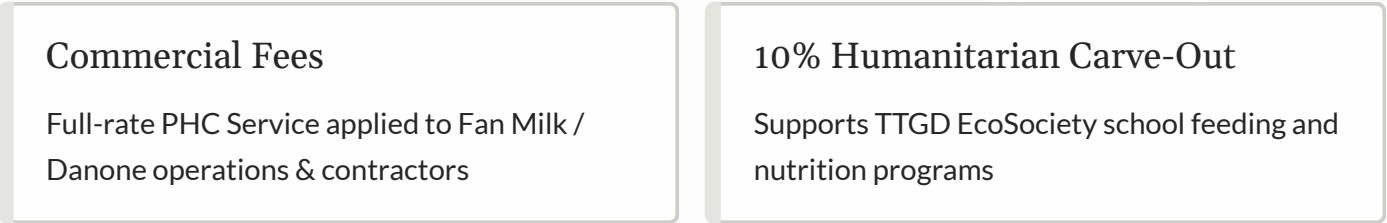

Quality Assurance & Standards
Hygiene compliance, ISO/FDA standards monitoring
- 5

Market Expansion Risks
Distribution network resilience, product shelf-life management

3. PHC Service Offer

4. Commercial + Humanitarian Flow

5. Next Steps
