

PHC Service One-Pager

Project: Oyo State Governance – PHC Service Integration

Location: Oyo State, Nigeria

Sector: Governance / Project Portfolio Management

Status: Commercial project portfolio identified; engagement with state government pending for full PHC Service adoption.

1. Project Snapshot

The Oyo State Governance project embeds PHC Service into state-level planning and project delivery, providing systematic identification, risk governance, and live monitoring of Commercial, Governance, and Humanitarian projects as a single integrated portfolio.

Systematic Identification

Comprehensive project discovery and categorization across all sectors

Risk Governance

Structured risk management framework for portfolio oversight

Live Monitoring

Real-time tracking and reporting across Commercial, Governance, and Humanitarian projects

2. Current Risks / Concerns

1

Delayed adoption of PHC Service for project monitoring

2

Fragmented visibility across Commercial, Governance, and Humanitarian projects

3

Missed opportunities for early risk detection on new projects

4

Lack of standardized reporting and portfolio dashboards

3. PHC Service Offer

PHC Service provides 7-Day Review for each new project, Open Concerns Dashboards for risk visibility, and portfolio-wide governance for Commercial, Governance, and Humanitarian projects. Humanitarian projects benefit from the 10% reduced rate while maintaining professional PHC oversight.

4. Commercial + Humanitarian Flow

Full-rate PHC Service applies to Commercial projects, with a 10% humanitarian carve-out funding TTGD EcoSociety initiatives. Governance projects serve as the bridge, integrating both streams into a unified portfolio.

3. Next Steps

- 1 Engage Seyi Makinde and state executive council for PHC Service adoption
- 2 Formalize PHC Service integration for portfolio monitoring
- 3 Deploy dashboards for project risk, cost, and schedule oversight
- 4 Onboard first wave of Commercial and Humanitarian projects
