

Creating Your EcoSociety Project Plan

*DOORWAY TO OUR
ADVANCEMENT*

Golden Truth
INSTITUTE

Introduction

You and your team are going to create a new society by conducting research on social structures, geography, weather, architecture, law, and other aspects of any civilization. You can locate your community anywhere in the world, but research your sites before deciding on a final place.

Specify a date in month of November / December 2023 or January 2024 to conduct your ZOOM presentation so that we can give you feedback and suggestions for improvement:

Set a Due Date : _____

Decide on a EcoSociety Project Plan Presentation Date: _____

While you work on your EcoSociety Project Plan, please ensure that your EXCO is established. Submit the full names (with their ID), roles of your EXCO to throughthegoldendoor@gmail.com and, we will review whether we can go ahead and send you the **Provisional License of Affiliation**.

Let's Begin The Process

You and your team will write a series of documents to define and explain the goals of your society and how it will align with the vision and the Key Value Indicators, create the Revenue & Expenditure Forecast (5 year plan & a 20 year plan, create maps and charts to explain different aspects of your current community (if any), write an anthem, design your EcoSociety Flag and more.

Name Your Society

What does the name mean, where did it originate from, and how does it represent your society? Make your explanation clear. This will be in the form of a short paragraph. (Keep it to no more than 5 sentences)

Let's say your Society's name is Abruzzo Oasis, and it is located in Italy.

In the TRUST License of Affiliation, the official name will be “TTGD EcoSociety Italy Abruzzo Oasis”

The Executive Committee

Write the names and 100 word profile of each of the Executive Committee Members, and their roles and responsibilities (*please refer to the TTGD EcoSociety Roles & Responsibility document shared on the 22nd Sep 2023*)

For each Member, please state clearly in another 50 words why that person is the best person for that role.

EcoSociety Location

Specify the exact location and take note of the population.

Note that each EcoSociety can have 70-100 Households. This is to allow for optimal support and interaction and relationship building.

In Africa, for instance, there could be 4-5 members in one household. If the population is greater than 300 (as a guide), establish more than one EcoSociety.

EcoSociety Location

How do people live in the Location / Land you are looking at? How do they earn a living, and where do they work? How many hours a week do they work? What types of activities do they do for recreation? What are their most prized possessions?

What is the size and the state of the land? What kind of terrain? Is it suitable for agriculture?

Any other information would be useful. A one page writeup with 1-2 photographs would be sufficient.

Current Houses and/or Buildings

What Do Your Current Houses and/or Buildings Look Like? Design and color a drawing on a full piece of paper that shows a typical home in your society.

Trade

What does your community or the community of the location you are looking at produce ? What will be the surplus goods you export through trade? What will you import through trade? Consider your geography.

Technology

What is the technology in place in your community or the location you are looking at? If it exists, what is its performance? Is it sufficient? How is it affecting your community?

What does the community aspire to, in terms of technology access? Are they technology literate ? If so, to what level?

Environment

Explain what are the environmental problems in that location in one paragraph. Share the environmental issues in your country. Brainstorm with your EXCO and your leaders how these problems can be solved.

Revenue Streams

Identifying the various revenue streams within your EcoSociety.

- * Early Childhood Educational Project Plan
- * Physical Preparatory Centre Project Plan
- * Entrepreneurship Development Project Plan
- * EcoHousing Project Plan (healthy, human-centric, sustainable)
- * Sustainable Agricultural Development Project Plan
- * Agro-Tourism Development Project Plan
- * Power Generation Project Plan (clean & abundant and low cost)

Create a Flag with a National Symbol for your EcoSociety

What you choose for your flag and symbol must have meaning-explain what it is in one paragraph.

Create Guiding Rules & Laws for your EcoSociety

Let's start with the 1st 5.

Write them out, and in 5 paragraphs explain why you have them, and how you insure their existence in your society.

Do note that when you write them out, have a brainstorming session in 2s and 3s with your EXCO and explore all the problems your current community, town, city, state or country has faced, and what kind of rules / laws should be in place. Once again, stay aligned in the vision of TTGD and the Key Value Indicators.

Anthem for your EcoSociety

This should be a song or poem that everyone will know and will sing/recite at special events. Explain the meaning of the song/poem.

Physical Map for your EcoSociety

Draw or Insert (or draw if you do not have a physical picture) the Physical Map of Your EcoSociety.

Make a map that shows the layout of your society. Be sure to include where important buildings are located, where resources are located, and any other key features.

You can create a collage of pictures if you wish. In a way, this becomes like a Vision “Map” for your EcoSociety jointly created by your EXCO.

NEXT

As you work on PAGES 2 - 14, we will have standalone lessons on creating these :

- * Early Childhood Educational Project Plan
- * Physical Preparatory Centre Project Plan
- * Entrepreneurship Development Project Plan
- * EcoHousing Project Plan (healthy, human-centric, sustainable)
- * Sustainable Agricultural Development Project Plan
- * Agro-Tourism Development Project Plan
- * Power Generation Project Plan (clean & abundant and low cost)
