

# PHC Service One-Pager

## **Project: Kwara Garment Factory (Ilorin)**

**Location:** Ilorin, Kwara State, Nigeria

**Sector:** Manufacturing / Industrial Development

**Status:** Factory operations transitioning to a preferred private operator; temporary maintenance shutdown during handover (2025).

### ***1. Project Snapshot***

The Kwara Garment Factory is one of Nigeria's largest state-supported manufacturing facilities, designed to produce mass-market apparel and create employment opportunities for women and youth. The project forms a cornerstone in Kwara's industrial diversification drive.

### ***2. Current Risks / Concerns***

- Transition management during operator handover
- Equipment maintenance and production continuity
- Supply chain reliability and raw material sourcing
- Training and retention of skilled workforce

### ***3. PHC Service Offer***

PHC 7-Day Review to evaluate transition management, operational handover risks, and workforce retention plans. Open Concerns Dashboard for monitoring factory operations, supply chain, and quality assurance performance.

### ***4. Commercial + Humanitarian Flow***

PHC Service delivered at full commercial rates for industrial oversight; 10% humanitarian carve-out supports TTGD EcoSociety women's vocational training, youth employment, and community enterprise programs.

### ***5. Next Steps***

- Engage Kwara State Government and new private operator for PHC onboarding
- Conduct PHC 7-Day Review during operational transition phase
- Implement PHC dashboards for production tracking and workforce development metrics
